

Scania Interim Report January–March 2013

Summary of the first three months of 2013

- Operating income fell to SEK 1,933 m. (2,323), and earnings per share fell to SEK 1.75 (2.24)
- Net sales fell by 4 percent to SEK 19,341 m. (20,127)
- Cash flow amounted to SEK 4 m. (1,763) in Vehicles and Services

Comments by Martin Lundstedt, President and CEO

“Scania's earnings for the first quarter of 2013 amounted to SEK 1,933 m. The stronger Swedish krona and price pressure on trucks pulled down earnings. Higher truck volume and higher capacity utilisation in Latin America had some positive effect. Order bookings for trucks remained at the same level as the end of last year while they increased significantly compared to the first quarter of 2012. Order bookings in Europe improved compared to the previous quarter. There is a replacement need, given the low truck deliveries in recent years. Scania is well-positioned ahead of the transition to Euro 6 emission standards and has launched the Scania Streamline truck with improved fuel economy, featuring second generation Euro 6 engines. Order bookings in Latin America remained at a high level. Demand in Brazil and Argentina is supported by subsidies. In both Europe and Brazil, Scania's performance has been stronger than the overall market in recent quarters. In

Russia, order bookings were at a good level and in the Middle East order bookings improved from a low level. Order bookings for buses and coaches rose significantly. Scania was awarded large orders in Russia and Asia. In engines, order bookings increased compared to the end of last year, especially in Europe. In local currencies, service sales increased somewhat in most regions during the quarter. Lower economic activity continued to adversely impact service demand in southern Europe. The stronger Swedish krona and price pressure on vehicles are increasing the focus on efficiency. European production was adjusted during the first quarter and a general review of projects and costs was conducted. In the longer term, there are good growth opportunities. Scania will therefore continue to prioritise investments in core development projects and will extend technical production capacity, as well as expanding the sales and services organisation in emerging markets.”

Financial overview

Business overview

Sales performance

During the first quarter of 2013, total deliveries increased by 4 percent to 16,938 (16,238) vehicles, compared to 2012. Net sales fell by 4 percent to SEK 19,341 m. (20,127). Currency rate effects had a negative impact of 7 percent on sales.

Order bookings increased by 31 percent to 20,787 (15,809) vehicles, compared to the first quarter of 2012.

New trucks with second generation Euro 6 engines reduce fuel consumption

In March, Scania unveiled Scania Streamline, a new long-haulage truck concept, featuring refined technology and new solutions that enable customers to reduce fuel consumption by up to 8 percent. The trucks have an aerodynamic design and feature a new version of the Scania Opticruise automated gearchanging system. Scania also expanded its engine range, adding second generation Euro 6 engines, which have lower fuel consumption than the equivalent Euro 5 engines. Scania has launched a total of eleven Euro 6 performance steps, three of which are engine alternatives that only use the Scania SCR aftertreatment technology, in order to meet Euro 6 standards.

Adjustment of production rate in early 2013

The daily production rate at the European production units was reduced during the first quarter. As of February, the daily rate was 15 per cent lower, than at year-end 2012. Capacity utilisation at the Latin American production units increased in early 2013 and will remain high also during the second quarter. Meanwhile, Scania is investing in expanded technical production capacity and in the next few years, an increase in annual capacity from 100,000 vehicles to 120,000 vehicles is planned.

Adjustment of the cost base

Scania has taken measures to boost efficiency by addressing the structure of the service network in certain European markets. Scania has a restrictive approach in hiring and is adjusting costs throughout the organisation, including administration and research and development.

Start of production in India

To facilitate manufacturing of complete vehicles on a local basis and to shorten lead times, Scania is constructing an industrial facility near Bengaluru (Bangalore). The industrial operations will consist of final assembly of truck and bus chassis, bodywork and fitting out of complete vehicles. A service workshop and a parts depot are also being constructed at the same location, which will mean improved service to customers.

Production is expected to start around mid-year, with trucks as a first step. During 2014, production of buses and coaches is expected to start. Capacity will gradually increase and will amount to about 3,000 vehicles per year when the facility is completed.

The truck market

Order bookings for trucks during the first quarter of 2013 increased compared to the first quarter of 2012. Compared to the fourth quarter of 2012 they were essentially unchanged. Order bookings in Europe improved compared to the fourth quarter of 2012. In Scania's assessment a replacement need exists,

given the low truck deliveries of recent years. The Euro 6 emission standard will go into effect on 31 December 2013 in the European Union. Owing to significantly more advanced technology, trucks with Euro 6 engines will command a higher sales price compared to the equivalent Euro 5 vehicle. Demand for Euro 6 trucks before year-end will thus depend on what subsidies are introduced, with the toll rate in Germany's Autobahn motorway system as one important factor. In markets without subsidies, some customers will be interested in investing in Euro 5 vehicles before Euro 6 engines become legally mandatory.

Order bookings in Brazil were weaker than the previous quarter, but remained at a high level. In Brazil and Argentina, subsidies are available for investments in new vehicles.

In Russia, order bookings were at a good level. In Asia, order bookings rose, mainly thanks to increases in the Middle East from a low level during the previous quarter.

In Africa, order bookings increased in certain markets compared to the previous quarter, while order bookings in South Africa remained at the same level.

Order bookings

Scania's order bookings during the first quarter of 2013 amounted to 18,236 (14,235) trucks, an increase of 28 percent compared to the same period in 2012. In Europe, order bookings rose by 13 percent to 8,034 (7,119) units during the first quarter. Order bookings rose in Great Britain and Poland, while they fell in the Czech Republic. In Eurasia, order bookings rose compared to the first quarter of 2012 to 1,556 (1,416) trucks, with an increase in Russia. In Latin America, order bookings rose sharply by 107 percent to 5,785 (2,792) trucks. The increase was mainly related to Brazil, but order bookings also rose in Argentina. During the first quarter of 2012, order bookings in Brazil were adversely impacted by the transition from Euro 3 to Euro 5 emission standards.

Order bookings in Asia decreased somewhat to 2,047 (2,257) units compared to the first quarter of 2012, mainly attributable to China and Indonesia. During the first quarter of 2012, Scania was awarded a large order by Zoomlion in China. In Africa and Oceania, order bookings amounted to 814 (651) units, an upturn of 25 percent.

Deliveries

During the first quarter, deliveries increased by 5 percent to 15,555 (14,849) trucks compared to the year-earlier period. In Europe, deliveries decreased by 6 percent compared to the first quarter of 2012. In Eurasia, deliveries increased by 6 percent to 1,200 (1,136) trucks.

In Latin America, deliveries rose by 47 percent to 5,481 (3,730) units compared to the first quarter of 2012. In Asia, deliveries fell by 30 percent compared to the first quarter of 2012 to 1,689 (2,400) trucks.

Sales

Net sales of trucks decreased by 2 percent to SEK 12,378 m. (12,653) during the first quarter. Currency rate effects had a negative impact of 8 percent on sales.

The total European market for heavy trucks

The total market for heavy trucks in 25 of the European Union member countries (all EU countries except Bulgaria and Malta) plus Norway and Switzerland decreased by 18 percent to about 47,400 units during the first quarter of 2013. Scania truck registrations amounted to some 7,000 units, equivalent to a market share of about 14.8 (13.6) percent.

Scania trucks	Order bookings			Deliveries

*Refers to Latin America

The bus and coach market

Order bookings

Order bookings for buses and coaches improved significantly during the first quarter of 2013. Scania was awarded major orders in Russia and Asia. Compared to the fourth quarter 2012, order bookings also improved in Latin America as well as Africa and Oceania.

Scania's order bookings for buses and coaches increased by 62 percent overall to 2,551 (1,574) units during the first quarter of 2013 compared to the same period in 2012.

In Europe, order bookings decreased by 16 percent compared to the first quarter of 2012. The downturn was mainly related to Spain and the Nordic countries.

Compared to the first quarter of 2012, order bookings rose by 62 percent in Latin America. The increase was attributable to Mexico and Brazil.

In Asia, order bookings increased by 49 percent compared to the first quarter of 2012, mainly attributable to a large order in Malaysia. Order bookings in Africa and Oceania rose by 74 percent, with increases in Australia and Kenya.

Deliveries

Scania's bus and coach deliveries totalled 1,383 (1,389) units during the first quarter of 2013. In Europe, deliveries decreased by 44 percent compared to the first quarter of 2012. Deliveries were up by 29 percent in Latin America. In Eurasia, deliveries increased sharply by 156 percent. In Asia, deliveries decreased by 40 percent while deliveries of buses and coaches in Africa and Oceania rose by 20 percent during the first quarter.

Net sales

Net sales of buses and coaches decreased by 8 percent to SEK 1,331 m. (1,449) during the first quarter of 2013.

*Refers to Latin America

Engines

In February 2013, Scania introduced Scania Gensets – a range of complete power generation units – at the Middle East Electricity exhibition in Dubai, United Arab Emirates. Scania's stand displayed gensets with outputs up to 665 kVA/60Hz and a new V8 16-litre XPI engine, for power generation needs up to 770 kVA/50Hz.

Order bookings

Order bookings improved during the first quarter of 2013 compared to the fourth quarter of last year, mainly attributable to Europe and Asia. Compared to the first quarter 2012, order bookings for engines decreased by 25 percent to 1,728 (2,293).

Deliveries

Engine deliveries decreased by 23 percent to 1,480 (1,914) units during the first quarter of 2013. The downturn was mainly attributable to decreases in Great Britain and South Korea.

Net sales

During the first quarter of 2013, sales decreased to SEK 249 m. (347), compared to the same period of 2012.

Services

Stable volume and negative currency rate effects

Service revenue decreased by 3 percent to SEK 4,280 m. (4,426) during the first quarter of 2013. Currency rate effects had a negative impact, while somewhat higher prices had a positive impact. In local currencies, the upturn in revenue was 2 percent.

In Europe, service revenue decreased by 3 percent to SEK 2,945 m. (3,049) compared to the first quarter of 2012. The downturn was mainly attributable to southern Europe. In Latin America, revenue decreased by 6 percent to SEK 596 m. (635) and revenue in Asia was 3 percent lower than the previous year at SEK 301 m. (309). In Africa and Oceania, service revenue decreased to SEK 288 m. (293) while in Eurasia revenue increased by 7 percent to SEK 150 m. (140) compared to the first quarter of 2012.

Earnings

Vehicles and Services

The first quarter of 2013

Operating income in Vehicles and Services totalled SEK 1,778 m. (2,192) during the first quarter of 2013. Negative currency rate effects as well as pressure on truck prices, mainly in the European markets, adversely impacted margins. Compared to the first quarter of 2012, the total currency rate effect was negative and amounted to SEK 475 m.

Since September 2012, Scania has been paying a "utilisation fee" per truck sold in Russia, which lowered earnings in the first quarter. Higher truck deliveries and improved capacity utilisation at the production units in Latin America had some positive effect.

Scania's research and development expenditures amounted to SEK 1,304 m. (1,305). After adjusting for SEK 265 m. (136) in capitalised expenditures and SEK 67 m. (54) in depreciation of previously capitalised expenditures, recognised expenses decreased to SEK 1,107 m. (1,223).

Financial Services

Customer finance portfolio

At the end of the first quarter of 2013, the size of Scania's customer finance portfolio amounted to SEK 44.0 billion, which represented a decrease of SEK 1.0 billion since the end of 2012. In local currencies, the portfolio increased by SEK 0.3 billion, equivalent to 1 percent.

Penetration rate

The penetration rate was 31 (36) percent during the first quarter of 2013 in those markets where Scania has its own financing operations. The decrease was mainly related to a changed market mix.

Operating income

Operating income in Financial Services rose to SEK 155 m. (131) during the first quarter of 2013, compared to the corresponding period in 2012. The improved earnings were due to a larger portfolio.

Scania Group

During the first quarter of 2013, Scania's operating income amounted to SEK 1,933 m. (2,323). Operating margin amounted to 10.0 (11.5) percent. Scania's net financial items amounted to SEK -15 m. (72). Net interest items amounted to SEK -8 m. (90). Net interest items were negatively affected by a lower interest margin on the net cash position and a lower average net cash position. Other financial income and expenses amounted to SEK -7 m. (-18). This included SEK 26 m. (-9) in valuation effects related to financial instruments where hedge accounting was not applied.

The Scania Group's tax expense amounted to SEK 520 m. (601), equivalent to 27.1 (25.1) percent of income before taxes. Net income for the period totalled SEK 1,398 m. (1,794), equivalent to a net margin of 7.2 (8.9) percent. Earnings per share amounted to SEK 1.75 (2.24).

Cash flow

Vehicles and Services

Scania's cash flow in Vehicles and Services amounted to SEK 4 m. (1,763) during the first quarter of 2013. Tied-up working capital increased by SEK 414 m., negatively impacted by a redemption of some SEK 800 m. related to the Swedish pension system PRI.

Net investments amounted to SEK 1,199 m. (746), including SEK 265 m. (136) in capitalisation of development expenses. At the end of the first quarter of 2013, the net cash position in Vehicles and Services amounted to SEK 9,554 m. compared to a net cash position of SEK 9,361 m. at the end of 2012.

Scania Group

Scania's cash flow in Financial Services amounted to SEK 69 m. (-638) during the first quarter. The Group's net debt decreased by about SEK 1.4 billion compared to the end of 2012 due to currency rate effects.

Parent Company

The assets of the Parent Company, Scania AB, consist of shares in Scania CV AB. Scania CV AB is the parent company of the Group that comprises all production and sales and service companies as well as other companies. Income before taxes of Scania AB totalled SEK 10 m. (18) during the first quarter of 2013.

Miscellaneous

The number of employees

At the end of the first quarter of 2013, the number of employees totalled 38,690, compared to 37,366 on the same date in 2012.

Material risks and uncertainty factors

The section entitled "Risks and risk management" in Scania's Annual Report for 2012 describes Scania's strategic, operational, legal and financial risks. Note 2 of the same report provides a detailed account of key judgements and estimates. Note 30 of the same report describes the financial risks, such as currency risk and interest rate risk. The risks that have the greatest impact on financial performance and on reporting for the Group and the Parent Company are summarised as follows:

a) Sales with obligations

About 10 percent of the vehicles Scania sells are delivered with residual value obligations or repurchase obligations. These are recognised as operating lease contracts, with the consequence that recognition of revenue and earnings is allocated over the life of the obligation (contract). If there are major changes in the market value of used vehicles, this increases the risk of future losses when selling returned vehicles. When a residual value obligation is deemed likely to cause a future loss, a provision is made in cases where the expected loss exceeds the as-yet-unrecognised profit on the vehicle. At the end of the first quarter of 2013, obligations related to residual value or repurchases amounted to about SEK 8.4 billion compared to SEK 8.6 billion at the end of 2012.

b) Credit risks

In its Financial Service operations, Scania has an exposure in the form of contractual future payments. This exposure is reduced by the collateral Scania has in the form of the right to repossess the underlying vehicle. In case the market value of the collateral does not cover the exposure to the customer, Scania runs a credit risk. Reserves for probable losses in Financial Service operations are set aside in the estimated amounts required.

Accounting principles

Scania applies International Financial Reporting Standards (IFRSs) as adopted by the EU. This Interim Report for the Scania Group has been prepared in accordance with IAS 34, "Interim Financial Reporting" and the Annual Accounts Act. New and revised standards and interpretations that are being applied from 1 January 2013 include the following:

Amendment to IAS 19, "Employee Benefits" – Scania already applies the method for measurement of pension liabilities contained in the new proposal, except that the returns on pension assets shall be measured based on the same discount rate as pension liabilities rather than on the estimated return. Since the size of plan assets is relatively small, the standard has not had any material impact on the financial statements, other than in relation to special payroll tax, which is now included in provisions for pensions. The amendment means that in the interim report SEK 498 m. is transferred from "Other provisions" to "Provisions for pensions" on 31 March 2013 (restatement of previous periods: - SEK 554 m. on 31 Dec 2012; SEK 378 m. on 30 Sep 2012; SEK 380 m. on 30 Jun 2012 and SEK 378 m. on 31 Mar 2012).

IFRS 13, "Fair Value Measurement" – The standard is being introduced to create a uniform definition of fair value and uniform valuation methods for measurement of fair value. New disclosure requirements are also being introduced. The change has meant that Scania now also includes a credit risk component upon valuation of derivatives, which has not had any significant impact on the financial statements.

Amendment to IAS 1, "Presentation of Financial Statements" -- implies new disclosure requirements of components accounted for in other comprehensive income in respect of items that will be reclassified to net income and those which will never be reclassified to net income.

Amendments to IFRS 7 "Financial instruments: Disclosures". The amendment relates to new disclosure requirements for offsetting financial assets and liabilities.

Accounting principles and calculation methods are otherwise unchanged from those applied in the Annual Report for 2012.

The Interim Report for the Parent Company, Scania AB, has been prepared in accordance with the Annual Accounts Act and recommendation RFR 2, "Accounting for Legal Entities" of the Swedish Financial Reporting Board.

Annual General Meeting and proposed dividend

The Board of Directors has proposed a dividend of SEK 4.75 (5.00) per share for the financial year 2012, with 8 May 2013 as the record date. This means that a total of SEK 3,800 m. will be transferred to the shareholders provided that the Annual General Meeting approves the Board's proposal. Scania's Annual General Meeting for 2012 will be held on Friday, 3 May 2013 at Scaniarinken, AXA Sports Center in Södertälje, Sweden at 14.00 CET (2.00p.m.).

Södertälje, 23 April 2013

Financial information from Scania

This Interim Report and calendar

This Interim Report will be presented at a press and analyst conference held at Moderna Museet in Stockholm at 11.30 CET on 23 April 2013. A telephone conference will also be held at 14.00 CET. Information about participation is available on www.scania.com.

Calendar for 2013

3 May	2013 Annual General Meeting
19 July	Interim Report, January-June 2013
23 October	Interim Report, January-September 2013

Forward-looking statements

This report contains forward-looking statements that reflect management's current views with respect to certain future events and potential financial performance. Such forward-looking statements involve risks and uncertainties that could significantly alter potential results. The statements are based on assumptions, including assumptions related to general economic and financial conditions in the company's markets and the level of demand for the company's products.

This report does not imply that the company has undertaken to revise these forward-looking statements, beyond what is required by the rule book for issuers at the NASDAQ OMX Stockholm, if and when circumstances arise that will lead to changes compared to the date when these statements were issued.

The Year-end Report for 2012 stated the following:

"Order bookings for trucks rose during the fourth quarter of 2012. The upturn was driven by Latin America and order bookings were exceptionally strong in Brazil, where extensive subsidies impacted demand positively. Order bookings in Europe remained at a low level. Customers are hesitant about investing in new vehicles in view of the uncertain economic climate. Meanwhile, there is a replacement need, given the low truck deliveries in recent years. The coming transition to Euro 6 emission standards may also provide some support to demand. Given low demand for vehicles in Europe and the Middle East, the daily production rate is reduced by about 15 percent in Europe in the beginning of the first quarter of 2013 compared to the end of 2012. A total of about 700 personnel on hire have been affected. An adjustment of the general cost level to lower demand is also under way."

¹ Net investments and change in working capital related to rental of vehicles during the first quarter of 2012 have been adjusted without impact on total cash flow. The negative impact on net investments and the positive impact from the change in working capital were overstated by SEK 247 m. This change was made in the June reporting.

Fair value of financial instruments

In Scania's balance sheet, items carried at fair value are mainly derivatives and current investments. Fair value is established according to various levels, defined in IFRS 13, that reflect the extent to which market values have been utilised. Current investments and cash and cash equivalents are carried according to Level 1, i.e. quoted prices in active markets for identical assets, and amounted to SEK 1,084 m. (1,171). Other assets that are carried at fair value refer to derivatives. These assets are carried according to Level 2, which is based on data other than the quoted prices that are part of Level 1 and refer to directly or indirectly observable market data, such as discount rate and credit risk. These items are carried under Other non-current assets SEK 802 m. (619), Other current assets SEK 318 m. (223), Other non-current liabilities SEK 344 m. (471) and Other current liabilities SEK 376 m. (364).

For financial instruments that are carried at accrued cost, fair value disclosures are provided in the table below. Fair value of financial instruments such as trade receivables, trade payables and other non-interest-bearing financial assets and liabilities that are recognised at accrued cost minus any impairment losses, is regarded as coinciding with the carrying amount.

For further information about financial instruments, see Note 31 Financial instruments in Scania's Annual Report for 2012.

Scania Group, SEK m.

	Q1 2013		Q1 2012	
	Total carrying amount	Total fair value	Total carrying amount	Total fair value
